PROJECT EXPERIENCE – Religious

St. Joseph's Church Carra Center, Lockport, NY

S&E assessed damage to masonry walls and floor slabs due to settling. Project included structural drawings for the rehabilitation of the structure to include new foundations and roof.

St. Jude Church, Sardinia, NY

S&E provided structural drawings for the renovation of an existing church. The renovation included a building addition, and the installation of a lift.

St. Martin of Tours, Buffalo, NY

S&E provided structural drawings for the rehabilitation of this church. The project included building additions, and an analysis of the existing structure for removal of an existing balcony.

United Methodist Church, Greenville, NY

S&E provided the structural plans for a new structure utilizing cold formed steel stud load bearing walls.

Renovations to the Rising Star Church, Buffalo, NY

This existing manufacturing facility is being renovated for use as a new church. **S&E** is responsible for the design of a new mezzanine, modification of existing trusses, design of a new decorative exterior structure, and the structural review of the existing rear wall.

Jewish Center Rehabilitation, Amherst, NY

S&E assessed damage to existing floor joists and column bases. Responsibilities include damage reporting and rehabilitation design.
